

# Maxicut 50C

- Digital plasma cutting machine with perfect function, high performance and advanced features
- Advanced digital control mode
- Advanced inverter technology, with PWM technology and high-power IGBT component
- Good consistency and stable performance

| Model                | Maxicut 50C        |
|----------------------|--------------------|
| Input voltage        | CA 220V±15%        |
| Frequency            | 50/60Hz            |
| Input capacity       | 6,1kVA             |
| No-load voltage      | 313 V              |
| Current regulation   | 20-50 A            |
| Nominal duty cycle   | 60%                |
| Cutting thickness    | Up to 20 mm        |
| Insulation class     | F                  |
| Degree of protection | IP23               |
| Packing size         | 470 x 270 x 380 mm |
| Weight               | 9,5 kg             |
