INTELIMIG

Adaptable to all brands and
models of MIG-MAG equipments

INTELIMIG is a MIG-MAG welding tool
equipped with a programmable
electronic device capable of
analysing and controlling various
parameters of the welding
process in real time,
interfering and avoiding failures.

Welding with Better Quality

Determines the repeatability of the welding.

CONTROLLED PARAMETERS

Guaranteed execution of the weld as defined.

FAILURE PREVENTION

Helps prevent losses, increasing production efficiency.

REAL-TIME INTERACTION

The equipment (control module + torch) helps the welder
maintain control of the process.

WELDER TRAINING

Assists in learning the correct welding process.

REMOTE DATA MANAGEMENT

Access to process status via the internet, without the need
for a special network.
