

**Portable, Professional,  
Robust, Affordable**

## Maxi MIG 200 MMA

### Serial configuration:

The MAXI MIG 200 MMA includes:  
3 meter MIG torch  
Welding cable and ground kit  
Gas hose

**Process:** Mig, MMA and Lift TIG

Whether you're a farmer, manufacturer, car mechanic or locksmith, the MAXI MIG 200 MMA will help you get the job done right!

It's a portable welding machine designed for industrial use, with 230V input power, which allows you to weld materials up to 5mm thick in TIG mode.

### Features:

- ⇒ Smooth arc without spatter, small machine in the MIG category with better start-up;
- ⇒ Voltage control, which adjusts the flexibility of the machine manually when welding aluminum, stainless steel, or whenever you want to adjust your own parameters for mild steel.
- ⇒ Thermal overload protection with indicator light, which helps prevent damage to the machine if the duty cycle is excessive or the air flow is blocked.
- ⇒ Inverter with DC power source, with an easy-to-use interface, providing only the necessary controls for a compact machine.

Model	MAXI MIG 200 MMA
Supply voltage	1 ~ 240 V $\pm$ 15% 50/60Hz
Supply voltage	27A / 6.5 kVA
Output current	MIG: 30-200A / MMA: 30-160A
No-load voltage	65 V
Output voltage	15-26 V
Duty cycle (40°C)	40% - 200 A
Wire speed	1.5-15m/min
Dimensions (LxWxH)	375 x 165 x 290 mm
Weight	8.5 kg
